

GOLF TIPS FROM BETH
(erinehold@pc-medical.com)

This month's tip, "When it comes to your pockets, make it simple."

How many of you, during a round of golf, have walked onto the putting green and fumbled around in your pocket for your ball mark or ball mark fixer? Or you are on the tee box and you are searching for your tee. How many times have you reached for your ball marker, only to have the entire contents of the right pocket and then the left pocket fall out helplessly onto the green. Oops!! Darn!!

I recommend a simple solution for knowing where all of your golf accessories reside. Pick a pocket, I use my right. And into this pocket should go the following items and only these items: one ball marker, one ball mark fixer, one long golf tee and one short golf tee. All of these items feel very different from one another and can easily be located in the pocket you have chosen. One pocket, one of each item, simple.

As for requiring an extra marker, on occasion, you can use the one on your golf glove snap. Most golf gloves have them. If you use a ball marker on your hat, that's even better. You have even less stuff in your pocket. Anything to help make this game simpler is a good thing. Oh yeah, and don't forget to keep your head down! Until next time, happy golfing.
